# SMART LightRaise™ interactive projectors

SMART

Inspired Collaboration™

Bring learning to life with the first interactive projectors to combine differentiated pen and touch capabilities with SMART Notebook™ collaborative learning software. Choose from two unique SMART LightRaise models: the versatile 60wi - which features two touch-points of interactivity and 2500 lumens of brightness - or the powerful 60wi2 - which offers four touch-point interactivity and 3000 lumens of stunning visuals. Whatever model you choose, the SMART LightRaise is the perfect way to make learning more interactive, engaging and fun.

Teach with powerful learning software

Both models of the SMART LightRaise include SMART Notebook collaborative learning software, as well as access to over 60,000 ready-made learning resources, letting you create and deliver lessons quickly and easily.

Experience stunning visuals

With 2500 lumens of brightness for the 60wi and 3000 lumens for the 60wi2, SMART LightRaise projectors deliver stunning HD visuals that keep students engaged. Ultra-short-throw projection also keep images free of distracting shadows and glare.

Collaborate with multiple users

SMART LightRaise projectors offer a natural and intuitive approach to collaboration. Plus, students and teachers can interact and learn together using dynamic multitouch gestures like zoom and rotate.

Quickly access control settings

The optional extended control panel available for both models of the SMART LightRaise offers a simple one-touch power on/off switch, plus all video, audio and touch data is carried through a single, easy-to-access cable connection.

Interact with a finger or a pen

With SMART LightRaise projectors, students and teachers can work together using natural finger touch and hand gestures or the interactive pen. The projector automatically detects whether a pen or finger is being used, without the need to stop and select from a menu.

Key Features

Both the 60wi and 60wi2 include the following unique features:

Touch and pen-enabled interaction
Differentiated pen and touch capabilities automatically detect whether a student is using a pen or their finger, creating a rich, interactive learning experience.

Multi-user touch interactivity
Between two and four students can collaborate together using natural and intuitive touch capabilities. Multitouch gestures also add a unique element of interactivity to learning.

Flexible installation
With the ability to project up to 100" onto a variety of surfaces, the SMART LightRaise is a customizable solution that can fit in any sized classroom.

SMART Notebook software included
SMART Notebook software lets teachers create and deliver engaging interactive lessons that draw students in.

Access to high-quality lesson content
Over 60,000 classroom-ready learning resources are available on the SMART Exchange™ website, letting teachers create lessons quickly and easily.

Integration with SMART solutions
SMART LightRaise projectors work seamlessly with other SMART products through SMART Notebook software, allowing teachers to work with the hardware they already have in their classroom.

Quick-connect control panel
The optional extended control panel lets teachers get started quickly and access cables in one convenient location.

Audio components
Includes two built-in 10-watt speakers and a microphone input, delivering a crystal clear audio experience that keeps students engaged.

Interactive pens and pen holder
SMART LightRaise projectors come with two rechargeable interactive pens that can be conveniently stored in the pen holder, ensuring teachers always have a fully charged pen on hand.
